

Abstract

The invention relates to a weatherstrip assembly which is used particularly for sealing a folding hardtop (10) of a motor vehicle and comprises a joint
5 consisting of sealing section (21) and fastening section (22) parts. The sealing section (21) is provided with a sealing lip (23), which is made of elastically deformable material, can be moved from the first position (I) to the second position (II) thereof and is provided with at least one restoring element (40).
10 In order to ensure a durable, efficient and reliable restoring response of the sealing lip (23), it is provided with a tensioning element (50) in the form of a hose on the end thereof.
